

WinBackup

Get prepared now. Protect your data, before it's too late - with WinBackup. The award-winning WinBackup is the difference between a minor inconvenience and a crippling loss. WinBackup has already earned the trust of over 100,000 users. Why don't you join them? Easy-to-use, yet so effective.

Awarded Best Backup Software of 2003 by Computer Shopper, WinBackup is the ultimate Windows security guard for your office, laptop, notebook, and home computer. This software safeguards your files against system failure, hard drive crashes, virus attacks, loss, theft, or user error.

Back up all data in the privacy of your office with a single click, including Outlook Express e-mails, address books, your Internet Favorites, and My Documents folder. And you won't have to spend hours on the phone with a technical support person. We guarantee it.

Best Backup Software of 2003 – Computer Shopper

Secure Your Data in Minutes?

You will get started in minutes when you see the familiar Windows look of our software. In no time at all, you can have automatic backups running. Our wizard guides you through the process to back up anything you want.

Use any media.

- Without leaving Windows, quickly back up to any media including hard drives, removable disks, USB drives, CD-R, CD-RW, DVD-R, DVD-RW, and more. Save to a device on a local drive or over the network.
- Create completely customized backups with customized security levels, compression, and extension filters.

Schedule worry-free automatic backups.

- Scheduling automatic backups is so easy with WinBackup's built-in scheduler that works on any Windows operating system. For example, you can schedule a daily network backup to a shared DVD writer.

Rest easy with our rock-solid security.

- Know you're safe with our built-in 256-bit encryption, compression, and CD/DVD writing. WinBackup uses one of the most secure encryption algorithms available (256 bit AES) to secure your data, making it virtually impossible for anyone to access your files without your permission.
- You can also select 128 bit encryption and password protection, depending on your security needs and storage location.

Save space.

- On-the-fly compression reduces the size of your backups, so you can back up more data to any media.
- Enjoy the efficiency of up to 50% compression for mixed data and up to 90% compression for text documents and emails.

Quickly locate the items you want to back up.

- WinBackup automatically locates important user files for you, making it much easier to back up all your files.
- WinBackup gives you shortcuts for Outlook and Outlook Express, Address Book, Internet Favorites, My Documents and your Desktop.

Restore entire backups or individual files quickly and easily.

- Restore your entire system or individual files in just a few clicks.
- WinBackup allows you to open and browse a backup file as if it was a regular folder, allowing you to restore files quickly.
- In the backup file, you can easily open documents and photos or copy files back to your hard drive
